Executive Summary

Problem Analysis

How can the Canadian Cancer Society scale Relay For Life Youth across high schools while reducing organizer burden and ensuring sustainable, year-over-year participation?

Ontario hotspots (Ottawa, Kitchener–London) dominate participation due to legacy school relationships

Ontario is overrepresented vs. the rest of Canada, limiting national growth potential

Expansion relies on historical momentum rather than scalable outreach strategy

- **Slower national expansion** and missed high-potential regions
- **Revenue concentration risk** in a few school networks
- **Diminishing marginal returns** from over-tapped markets

Event planning spans an entire semester, increasing workload fatigue

Teacher advisors carry execution risk when student leadership is inconsistent

Administrative support fluctuates, making continuity fragile year-over-year

- **Higher event drop-off** after 1/2 years
- **Inconsistent student engagement** and leadership continuity
- **Reduced scalability** due to reliance on individual teacher champions

Decision-Making Matrix

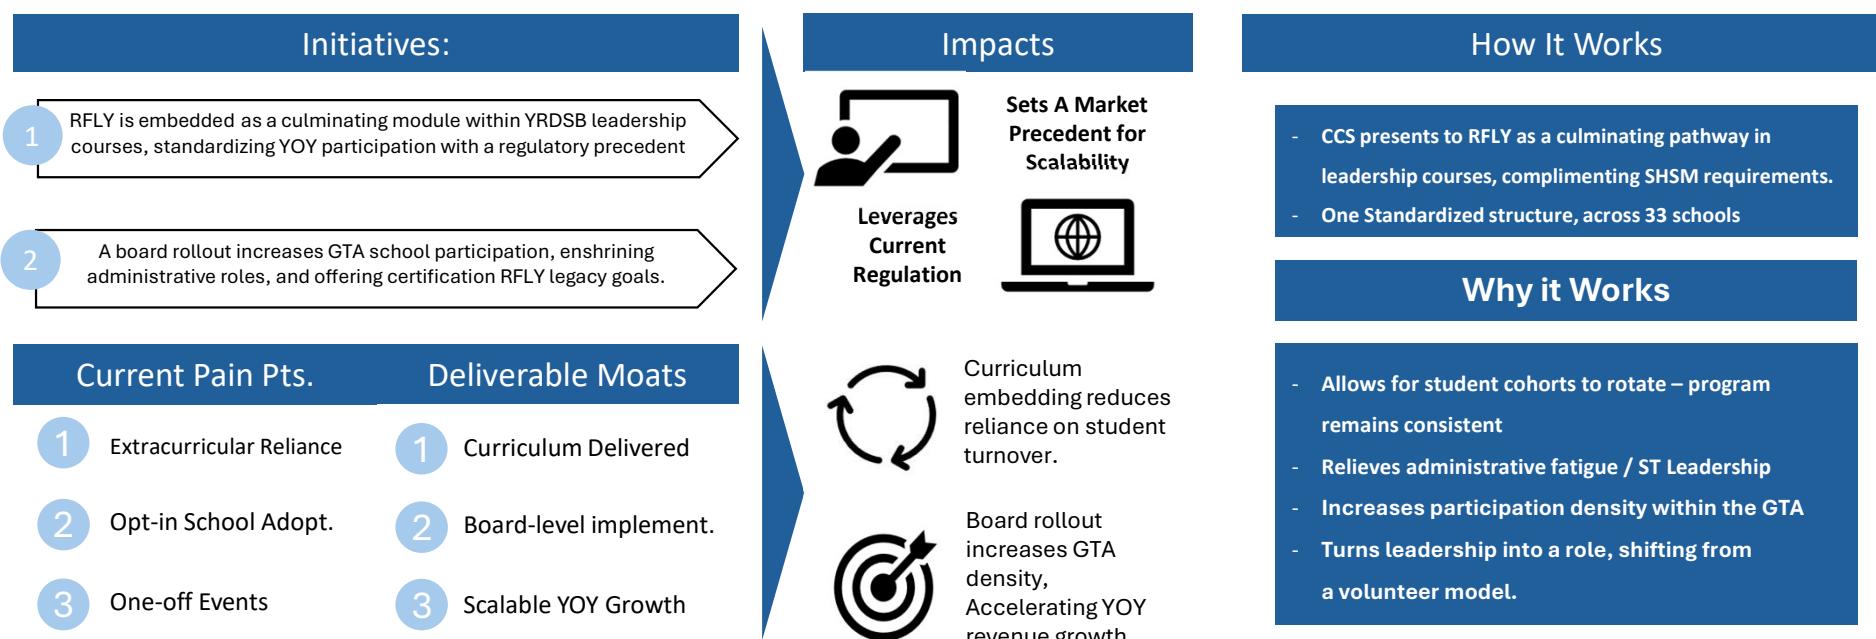

Evaluating alternative solutions for CCS to implement on a scale of effectiveness from 1-5 (lowest to highest).

Criteria	Weightage	Leadership Course Involvement	School VP-led model	School Certification Program
Teacher Workload Reduction	30%	3	3	2
Sustainability of solution (continuity)	20%	4	3	3
Scalability across schools/boards	15%	5	4	5
Feasibility of Implementation	20%	4	3	2
Student Engagement	15%	5	2	3
Total Score	100%	4	3	2.8

Core Solution: Institutionalizing Course Content (YRDSB Pilot)

Relay For Life Youth will be embedded as a culminating pathway within YRDSB leadership courses, creating automatic, repeatable participation each year. By anchoring Relay within existing curriculum structures, this board-level model restores GTA participation density and supports sustainable long-term growth.

Scope & Focus: Focuses on Business SHSM Offering, Business Leadership Course, that's repeatable YOY, piloting with the YRDSB, and growing other School Districts with a Market Precedent.

Revenue Projections

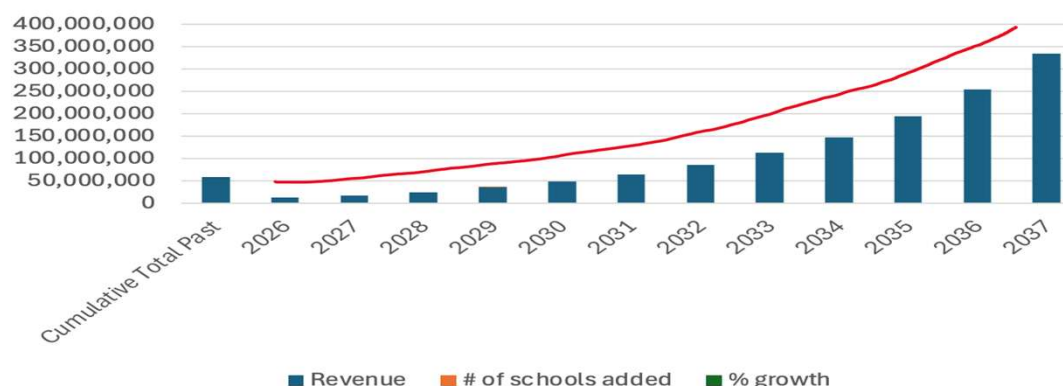

Our revenue growth of \$20,000,000/year is achieved in 2028 onwards with revenues exceeding over \$300,000,000 in 2037 if school boards are mandated to support the cause of Canadian Cancer Society through the curriculum implementation.

	Cumulative Total Past	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035	2036	2037
Revenue	58,426,778	13,100,000	17,161,000	23,866,910	35,885,652	48,690,204	64,582,168	85,358,640	112,491,818	148,036,281	194,347,528	255,015,262	334,489,994

Assumptions:

- Conservative Average Revenue/School: **\$70000**
- Average Revenue Growth: **31%**
- Implementation Revenue begins at 2028
- Order of Implementation: **YRDSB, PDSB, TDSB, HDSB, DDSB, WRDSB, SCDSB**

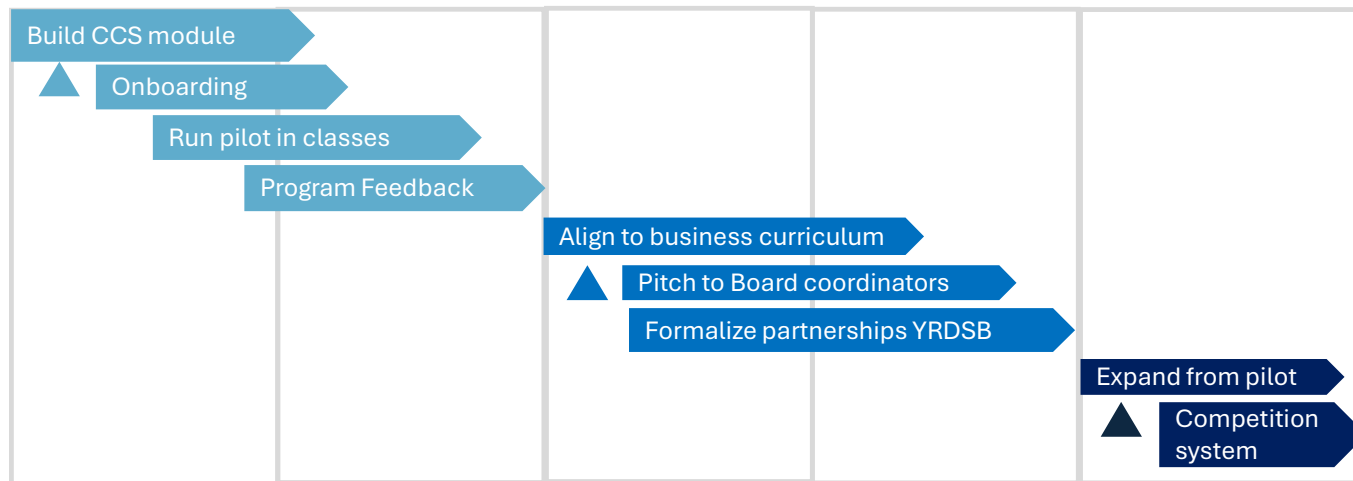

Implementation Timeline

Q1: Build

Q2: Approve

Q3: Scale

Must-Win Battles

Teacher adoption must be frictionless.

Stakeholders: Business Leadership Teachers

Formal board approval across schools

Stakeholders: School District Boards

Minimal school staff workload and student engagement

Stakeholders: Students and staffs

KPIs

1

Increase school retention by 25% year over year

2

Reduce teacher on hands time by 70%

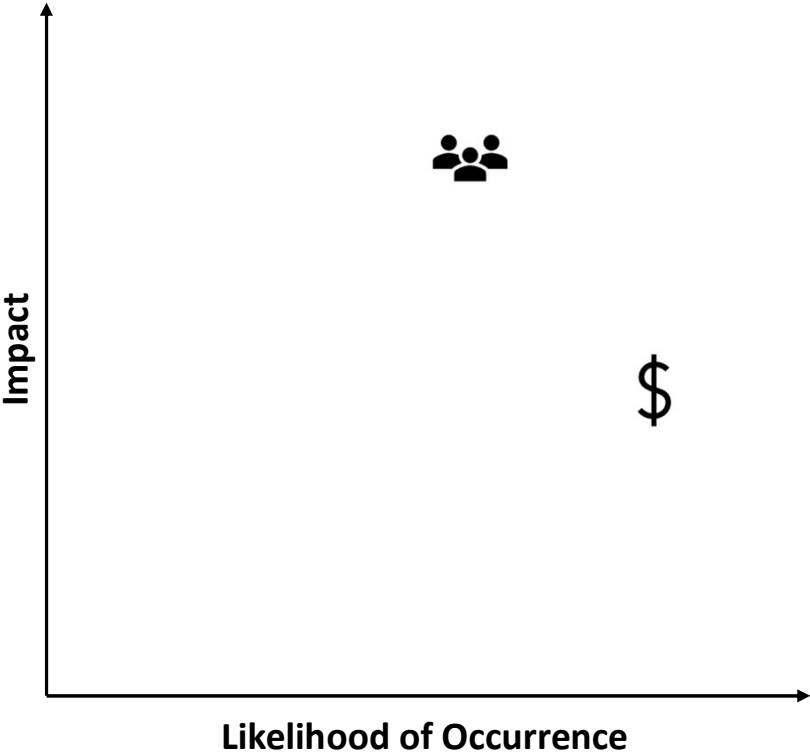

3

Onboard 15 schools in YRDSB

Risks & Mitigation

Our primary risks include provincial education budget cuts, and reduced event quality but we plan to mitigate those risks by positioning RFLY as plug-in module and maintaining non-negotiable components.

Risks	Mitigations
Provincial Education Budget Cuts Reason: Increased risk aversion from school boards, may avoid new partnerships + deprioritize leadership initiatives for academic content.	• Position RFLY as a plug-in to existing curriculum outcomes (ex. no new courses needed). • Reduces associated admin + financial risk for module.
Academic Performance affecting Event Quality Reason: Embedding RFLY into coursework may shift focus from mission-driven to grade-driven, inconsistent event equality across schools.	• Process based grading focused on engagement + planning > fundraising performance. • Maintain long-term KPIs, and non-negotiable module components such as the core ceremonies.

Q&A
